CMS Interoperability Planning Collaborative

- Collaboration among counties to meet new CMS data sharing requirements
- Create strategic planning roadmap

48 COUNTIES participating

Key Program Activities

- Group discussion and sharing
- Subject matter experts, health plan and industry references
- Resources and templates

Special Thank You and Acknowledgement

This program is supported by a grant from the California Health Care Foundation.

Strategic Questions – How Does this Impact My County

- How does this impact my county?
- What are the most critical things I should be planning for?
- How does this help us do what we have to do anyways/are doing now?
- How does this help us do what we need (or plan) to do in the future?
- **Initial Education**
- **March-July 2022**
- **August-Dec 2022**
  - August 2022 – March 2023
- **Jan-July 2023**
  - April 2023 – Dec 2023

- **Build vs Buy RFP/Procurement**
- **Readiness Priority Issues**
- **Implementation**
Survey Question: Why did you join?

Learn from others. Collaborate.

See/ hear what others are doing.

Make sure our approach is consistent with other counties.

Sounding board for some decisions and plans we are making.

Better understand the requirements, get up-to-date information.
Components to Drive Collaboration, Program Goals

FAQs from Primer

- ONC 21st Century Cures Act vs CMS interoperability requirements
- Does a portal into our EMR satisfy this at all or is that separate?
- Where does CTEN/ HIEs fit into this?
- Is the consumer data stored in the API?
- Do minors have protections against parents accessing assessments and progress notes from the minor's records thru API 3rd party Apps?

### Technical Standards

1. FHIR Release 4.0.1

2. SMART on FHIR Application Launch Framework 1.0.0 (OAuth 2.0 for 3rd-party app authorization)

3. OpenID Connect, version 1.0, incorporating errata set 1 (for member authentication)

### Content and Vocabulary Standards

4. U.S. Core for Data Interoperability, version 1

---

**Evolving Standards**

- FHIR draft R5 released 2020
- USCDI v2 released 2021
- USCDI draft v3 just released

- Solution that is flexible, scalability, and dedicated
- Ongoing management, support and costs
Cost Considerations

**CMS Estimates**
- 6+ month implementation process
- $788K - $2.5 million implementation costs per impacted payor

**Health Plan Experience So Far**
- Long RFP and contracting process if “new” vendor
- 6-12 month implementation process (don’t believe vendors who promise 3 months!)
- Implementation costs much less than CMS estimates (based on “enrollment size”)
- Ongoing costs higher than CMS estimates (based on “enrollment size”)
Key Takeaways

- New and challenging implementation for everybody
- Slow and steady: have a plan, make progress
- Ongoing implementation - and investments
- Weak short-term benefits (consumer engagement), but significant long-term potential for more efficient data exchanges
  - County-to-provider/ county/ health plan/ HIEs
  - Internal data management, program/organizational goals
- CMS (and ONC) interoperability standards becoming industry standards
- Approach to interoperability solution: compliance vs core system
